

# LET'S TALK ABOUT POOL FLOATS

## CASTING HOPE FOR SAFER SWIMMERS

### IS YOUR CHILD TIRED FROM SWIMMING AND IN NEED OF A BREAK?

No device replaces adult supervision. Always watch your child in and around water. When in the water, remain within arm's reach of your child at all times.

#### CHOOSE THESE:

These options are more safe because they have a flat or mesh bottom which keeps your child's legs from dangling in the water, and prevents them from becoming comfortable in a vertical (unsafe) position.

#### NOT THESE:

These options are less safe because they place your child in a vertical (unsafe) position.
